IndustrialTools

Auto Feed Drills & Tappers

- *Comprehensive range*
- *Single spindle operations*
- *Multi-spindle processes*

More Than Productivity

AFD Applications

Ease of Integration into Machine or Process

- Extensive range of mounting clamps
- Control interfaces to link AFD(E) to other equipment through pneumatics or electrically
- Single signal required for AFD(E) to perform cycle
- Output signals at datum and depth
- Electric motor mounting on 200, 400 and 600 series can be rotated 180°

Comprehensive range of Product

- For single spindle operations to multi spindle processes
- Pneumatic and electric drive from 0.22 to 1.1kW (0.3 to 1.47hp) with thrusts from 1735N (390lbf)
- Reliability through quality

Modular Design

- Flexibility of unit function and speed
- Common components in different models reduce inventory
- Multiple spindle head options
- Drilling and tapping options for all models

Auto Feed Drills & Tappers

Auto Feed Drills & Tappers Features	4
How to select your AFD	5-7

DRILLING

AFDE200 - AFDE230 (Electric drive).....	8-9
0.25 kW (0.34hp) - 850 to 11950 rpm	
AFD205 - AFD215 (Pneumatic drive)	10-11
0.22 kW (0.30hp) - 650 to 18700 rpm	
AFDE400 - AFDE430 - AFDE410 - AFDE440 (Electric drive)	12-13
0.33 - 0.75 kW (0.44 - 1hp) - 330 to 11950 rpm	
AFD415 (Pneumatic drive)	14-15
0.38 kW (0.5hp) - 490 to 18000 rpm	
AFDE610 - AFDE620 - AFDE640 (Electric drive)	16-17
0.75 - 1.1 kW (1 - 1.47hp) - 330 to 6300 rpm	
AFD684 (Pneumatic drive)	18-19
0.61 kW (0.82hp) - 60 to 3300 rpm	

TAPPING

AFTE480 (Electric drive)	20-21
0.75 kW (1hp) - 180 to 1740 rpm

Auto Feed Drills & Tappers Features

How to select your AFD

How to Order :

Model Type

Pneumatic Feed and Drive

AFD205 0.22kW (0.30hp)
AFD215 0.22kW (0.30hp)
AFD415 0.38kW (0.51hp)
AFD684 0.61kW (0.82hp)

Pneumatic Feed, Electric Drive

AFDE200 0.25kW (0.34hp)
AFDE400 0.33kW (0.44hp)
AFDE410 0.75kW (1.00hp)
AFDE610 0.75kW (1.00hp)
AFDE620 1.10kW (1.50hp)

Electric Feed and Drive via Leadscrew

AFTE480 0.75kW (1.00hp)

Control Block (see page 22)

A1 – Full feature type⁽¹⁾
– Automatic cycle
A6 – Simple type⁽¹⁾
– Remote cycle control
A7 – Leadscrew type – PNP
A8 – Leadscrew type – NPN

Output Spindle (see page 24 to 28)

Code Output type

- Chuck
- Collets
- Multi Head
- Tapper

OPTIONAL

- HCU
- Clamps
- Interface K

(see page 23 to 32)

(1) Not required on AFTE models.

General Data

Multi Spindle Drilling

To calculate the cross sectional area of a drill diameter use the formula $u(r^2)$ ($3.14 \times \text{radius}^2$)
For example, Area of Ø 6mm hole $3.14 \times 3 \times 3 = 28.26\text{mm}^2$

1. Calculate cross sectional area of hole by referring to the table below the formula.
2. Calculate the cross sectional area of a hole by the number of spindles.
3. Select the nearest greater hole cross sectional area from the table.
4. From the specification charts on pages 6 and 7 select the AFD with the appropriate capacity.

Example - AFD415

5 off Ø 1.5mm holes to be drilled in aluminium - $1.766 \times 5 = 8.83\text{mm}^2$

Ø 4mm hole has a cross sectional area of 12.56mm^2

Therefore AFD415-5400 has adequate capacity to drill 5

off Ø 1.5mm holes in aluminium.

The above data is a guide for reference purposes only. Please read carefully the safety operating and maintenance instructions supplied with the unit prior to installing your Desoutter Auto Feed Drill. The performance data for air drive and feed functions are obtained with an air inlet pressure of 6,3 bar, and the speeds indicated are nominal. The capacities listed in this catalogue are for guidance only, and actual test and / or consultation with your local Desoutter Sales Representative is always recommended. Specifications are subject to change without prior notice.

Ø		AREA

Pneumatic drive - feed

■ AFD415

0.38 kW (0.51hp) - 490 to 18000 rpm

- Long working stroke of 100mm (3.94»)
- Spindle sealed to IP64 standard
- Capacity up to 10mm (3/8») in aluminium, 8mm (5/16») in mild steel
- Modular output spindles

COMPACT UNIT AND VERSATIBLE RANGE

For use with Multi-spindle heads output spindle B24 is needed

Tapping gearbox & Accessories: see pages 22-32

SILENCER

OPTIONAL ACCESSORIES

	PART NO.
1 Silencer - sinter bronze (noise clamp 15 dB(A) - Power loss 10)	205 054 1743
2 Silencer (noise clamp 20 dB(A) - Power loss 10)	205 054 1773
3 Silencer (noise clamp 25 dB(A) - Power loss 7)	205 054 1783

Electric drive - Leadscrew feed

■ AFTE480

0.75 kW (1hp) - 180 to 1740 rpm

- High power brake motors with 0.75kW (1 HP)
- Supplied fitted with proximity switches for depth, datum and 'no hole' sensing, PNP
- Quick release interchangeable lead-screw and nut assembly
- Capacity up to 10mm (3/8») in mild steel, 16mm (5/8») in aluminium depending on thread form

HIGH POWER AND ACCURACY

Optional NPN Switches kit available:
(P.N. 205 055 928 3)

Control Blocks and Interfaces

Control Blocks

**A1 Full Feature
Control Block
Part No. 436313**

**A6 Simple
Control Block
Part No. 103862**

Air Connections

- R** Air Return Port – Connects to breather port in the nose of the tool to provide extra retract capability with heavy front end attachments (10-32)
- ST** Start Button – For manual operation and set-up
- 1** Remote Start Signal Port Pulse (10-32)
- SP** Manual Stop Button – Interrupts cycle and returns AFD to datum
- P** Remote Stop Signal Port – Requires external signal pulse for returning the unit to datum rest position (10-32)
- Air inlet (1/4" BSP or 1/4" NPT)
- M** Work Cycle Complete Port – Used for sequence control with other AFD's clamps, index tables, etc (positive at datum position) (10-32)
- Depth Stop Signal Port – Used with external circuits such as dwell or pecking (10-32)
- Retract rate adjustment control
- Advance rate adjustment control
- Feed rate adjustment control
- F** Feed port (1/8" NPT)
- RN** Return port (1/8" NPT)

Electrical Connections

- S1** Start solenoid
- S2** Stop solenoid
- SW1** Datum return (M8 x 1.00)
- SW2** Depth position (M8 x 1.00)

Electrical Interfaces (not included with control blocks)

C3 Part No. 104002

Comprises:
2 x M8 Proximity Switches PNP (NO)
2 x Plug-in Cables

C5 Part No. 104842

Comprises:
2 x M8 Proximity Switches NPN (NO)
2 x Plug-in Cables

Solenoid Valves

All 24V DC
NC – Valve normally closed
NO – Valve normally open

Proximity Switches

All 10-30V DC
NC – Normally closed
NO – Normally open

C10 Part No. 438223

Comprises:
2 x M8 Proximity Switches PNP
2 x Plug-in Cables
2 x Solenoid Valves (NC)

C11 Part No. 438233

Comprises:
2 x M8 Proximity Switches PNP
2 x Plug-in Cables
1 x Solenoid Valve (NC)
1 x Solenoid Valve (NO)

C12 Part No. 438243

Comprises:
2 x M8 Proximity Switches NPN
2 x Plug-in Cables
2 x Solenoid Valves (NC)

Each of these H.C.U unit needs the conversion Kit Part Number 94982 to be installed

Peck feed control

Used when hole depth is five times hole diameter. Helps clear chips, avoids overheating and bit breakage. Hole accuracy is improved. For use with Full Feature Control Block A1 (0-10 seconds)

STROKE		PART NO.
D4	25mm (1")	92282
D5	50mm (2")	92292
D6	75mm (3")	92302

Dwell control

Used to dwell drill bit at the bottom of the stroke. Can be used to spot face, blind hole polish, friction weld plastic components and spin rivet. For use with Full Feature Control Block.

DESCRIPTION		PART NO.
E1	Dwell Control Unit Complete	92372

Skip feed control

Skip drilling - custom H.C.U's available on request. Skip control ensures minimum cycle times without breakthrough burrs when drilling tubes, pocketed castings etc, with two controlled feeds, and fast travel through the empty space.

Information Required
1. Depth of first cut
2. Depth of skip
3. Depth of second cut
4. Drill point angle

Accessories

OUTPUT SPINDLES

- Interchangeable modular output spindles
- Precision option for collet types, R2 and R36

AFDE200/230 - AFD205 - AFD215

	FUNCTION	ORDER CODE	FEATURES	PART NO.	RECOMMENDED SPEED RANGE
	High Speed Output Spindle	K42	Collet Chuck can be fitted to any AFDE200 to step up speed by 4.28 : 1. Note: Max. allowable speed 27000 rpm. See page 28 for collets.	375263	≤ 5250 rpm
	Collet Chuck	K2	See page 28 for range of collets.	357183	≤ 18800 rpm

For fixed “D” spindle heads, please contact your local customer center.

Minimum centres are dependent on collet size, overall diameter on the distance between spindle and overall lengths on collet size.

Desoutter can provide dimensions if required.

Always provide details of hole pattern, hole diameters and material to be machined when ordering a fixed spindle head.

AFDE200/230 - AFD205/215

Technical drawings of the 1000 Series 1/2" components. The left drawing shows a side view of a 90-degree elbow with dimensions: 7.5mm (0.89") for the inlet/outlet diameter, 115mm (4.52") for the center-to-center distance, 70mm (2.75") for the flange width, 81mm (3.18") for the flange thickness, 5mm (0.19") for the flange lip, and 122mm (4.80") for the total height. The right drawing shows a side view of a 180-degree elbow with dimensions: 57mm (2.24") for the center-to-center distance, 95mm (3.74") for the total length, 54mm (2.12") for the flange width, 28mm (1.10") for the flange thickness, 63mm (2.48") for the flange lip, and 40.04mm (1.57") for the flange diameter. The drawings also indicate a 08.7mm (0.32") hole and a 95 CRS (3.74") material specification.

Technical drawing of the 1000 Series 1/2" (25.4mm) connector. The drawing shows two views: a side view and a front view. The side view shows a connector with a length of 69mm (2.72") and a height of 63mm (2.48"). The front view shows a connector with a width of 96mm (2.77") and a height of 53mm (2.08"). The front view also shows a central opening with a diameter of 40.00mm (1.57") and a top flange with a diameter of 45mm (1.77").

[illegible]

Mounting Tube

A 3D rendering of a silver mounting tube, which is a long, hollow cylinder. Above the tube, there is a gray puzzle piece icon, indicating that this part is a component of a larger assembly.

Tubing is of the same outside diameter as the auto feed unit and is available in the following standard lengths.

PART NO.

• Parallel clamp	61832
• Right Angle clamp	61822
• Swivel clamp	61802
• Swan Neck clamp	61862
• Base clamp	61842
• Bar clamp	61852
• Mounting Tube 228 (9") length, Ø 39.97-40 (1.574"-1.575")	39702
• Mounting Tube 457 (18") length, Ø 39.97-40 (1.574"-1.575")	39732
• Mounting Tube 610 (24") length, Ø 39.97-40 (1.574"-1.575")	39742

AFD Selection Program

The Desoutter AFD selection program allows you to select Auto Feed Drills or Tappers for applications where the following parameters are available:

- Hole diameter or thread size
- Hole or thread depth
- Thread pitch (tapping only)
- Number of holes
- Material to be drilled or tapped
- Blind or through hole (tapping only)

For further details please contact your local Desoutter representative.

AFD SELECTION TEMPLATE

THIS TEMPLATE WILL HELP YOU TO FIND THE RECOMMENDED TOOL FOR YOUR DRILLING JOB
Please be warned that its use for Reaming Job is not advised.

How to use :
- Section 1 - Please fill the mandatory fields marked with * and, if available, other optional information
- Section 2 - Recommended tools will appear with additional information

Drill diameter * 12 mm

Pre-Drill diameter 6 mm

Number of spindles * 1

Approach time 0,1 s

Retract time 0,2 s

MATERIAL SELECTION * Steel - Mild (P<= 700N/mm²)

Thickness * 7 mm

Use of carbide drills bit ? no

2

RECOMMENDED TOOL :

Pneumatic tool : AFD684 -965

Electropneumatic tool : AFDE610 -900

OPTION - In case you want to change the parameters for Material :

Automatic Parameters : v_c "Cutting speed" (m/min) 20-30 Feed Speed (mm/r) 0,216

Customized Parameters * : [input field]

* If filled, they will replace the automatic parameters in the calculation

Technical Results - FOR INFORMATION

Recommended Speed	663 rpm
Dynamic thrust "T"	1305 N
Lost Power "P"	0,476 kW
Engine Power	0,560 kW
Speed feed "R"	143,2 mm/min
Drilling time	6,1 s
Cycle drilling time	6,4 s

(calculated for open hole)

HCU CHOICE - OPTIONAL

Open Hole - Max. Stroke = 14,5 mm -> D1 HCU Unit 91942 can be used

Blind Hole - Max. Stroke = 11,5 mm -> D1 HCU Unit 91942 can be used

PECK FEED - OPTIONAL

No need to add a Peck Feed Kit

Release date : 16/02/2016

CAD drawing files for the Desoutter Auto Feed Drills and Tappers are available on www.desouttertools.com/resource-centre

For more information about Desoutter tools, please ask for the Desoutter catalogue 6159939341 or visit www.desouttertools.com and look in the Industrial Tools on line catalogue
