

# Abrasive expert.

**SUHNER**

**SUNNER** has been designing, developing, and manufacturing Abrasive Power Tools for materials surface conditioning since 1914.

Future oriented research and development, high quality standards and intensive exchange of ideas with users have brought us to individual problem solving solutions for industry.

**SUNNER**, with over 700 committed employees, plants in several countries, and a worldwide distribution system, ranks among the leading manufacturers in various areas of production technology.

Innovative marketing concepts derived from daily practical experience, supported and optimized by engineering, assure that **SUNNER** products stand up to daily industrial use, and that **SUNNER** know-how is always up to date.

## SUHNER.

SUHNER HOLDING AG, CH-5201 BRUGG AG, Schweiz  
Executive board

Dear valued customer,

Our company enjoys significant success in the area of industrial materials conditioning.

We would like to present to you our new and extremely attractive abrasive program. These abrasives are made to our specifications with materials designed and developed in conjunction with the world's leading manufacturers of abrasives. Always, quality and performance are our utmost goal. May we introduce to you our range of state-of-the-art, non-woven nylon abrasives which are suitable for surface cleaning to a mirror-finish quality.

For optimum results, we offer a variety of power drive units. Our selection of Electric, Air, and Flexible shaft driven Grinders/Polishers meets most any requirement. We offer motors from 75 Watts (0.1 HP) to 3,200 Watts (4.3 HP) and speeds from 150 rpm to 80,000 rpm..

First and foremost for us, marketing means application oriented problem solving, intensive customer service, an on site demonstration concept, and an international exchange of ideas and experience. Please put us to the test. Our «Abrasive Expert» would appreciate the opportunity to personally demonstrate our advice and experience in this area.

We look forward to hearing from you.

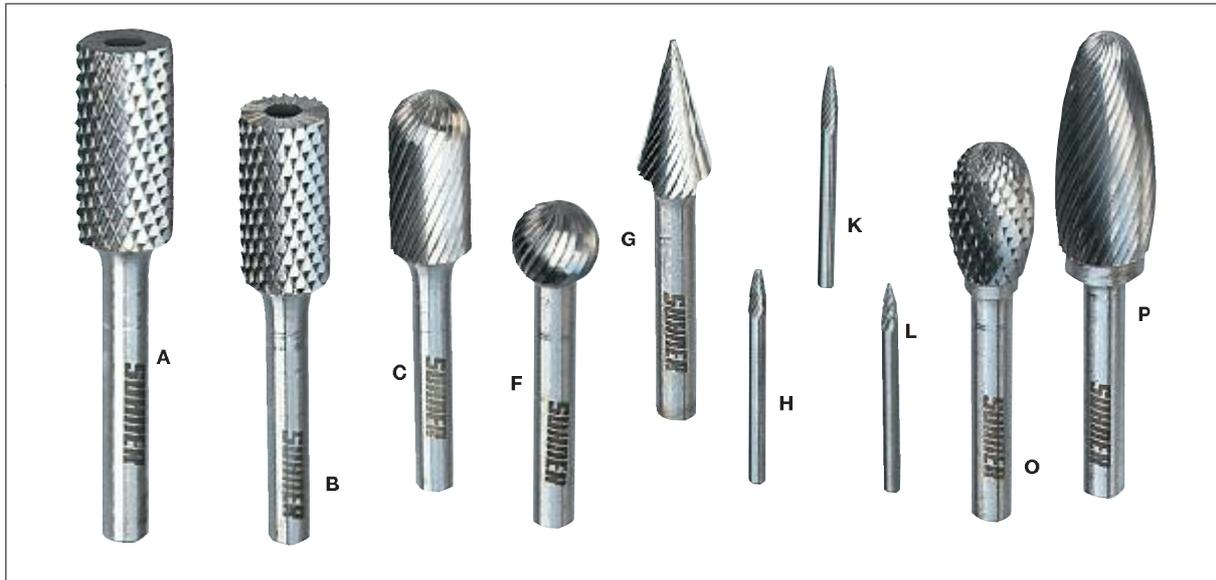

Sincerely,  
SUHNER HOLDING AG

Otto H. Suhner  
Dipl. Ing. ETH

## Carbide Burrs: Long life, high quality

- Extremely high cutting rate and long life, can be reground repeatedly.
- Professional chip removal and excellent finish with the special standard cross N cut or NK double-cut diamond tooth pattern.
- Smooth running, especially with **SUMNER** drive tools running with precision bearings.

## Grinding – and Cutting Wheels: In proven quality

### Magic Disc

- High-performance grinding wheels: unequalled stock removal and long service life on all materials, in particular on aluminum.
- Only little dust, noise and heat generation, excellent grinding pattern
- Flexible grinding wheel, 3 mm (black): pleasant handling, available in three grain sizes: grinding and polishing in a single action. Use with backup pad.

### SUN-disc M

- General purpose wheels for a wide variety of grinding and cutting applications in steel and stainless steel fabrication.
- Cutting wheels: Extremely high cutting rate, due to 2 mm thickness, Type 1-flat, (reduces operating time).
- High efficiency due to optimum ratio of cutting rate/life.

### Turbo-disc

- Cutting disc with reduced drag.
- Less material loss due to thin cut.
- Reduced heat development.
- Less slag.
- Reduced odor.
- Fast cut.
- Consistent cutting guidance.

## Superflex® Flap discs

Cool cutting due to ventilation principle

### LFS/LFT Superflex and LFS Superflex Nylon

- Cool working: extra-thick for maximum ventilation.
- High-quality zircon abrasive: no clogging, coating or vitrification.
- Low wear: 10 to 12 times the service life of conventional fiber discs.
- Good tool handling and non-tiring work even when processing large surfaces.
- For Inox, steel and aluminum.
- Available with both fiber and nylon backing.

### LFS-F: Flexible flap disc, concave

- For soft and cool cutting with Angle Grinders.
- Better finish especially on uneven surfaces.
- Easy to use on profiles, edges and angles, where conventional discs can't do the job.
- Longer service life over conventional fiber discs.

## Cleaning discs for removal of paint, discolorations, rust, etc.

### FVOT

FVOT cleaning discs consist of synthetic fiber, grit, and resin. Specially for fast and constant cleaning of stainless steel without removing material. Also suitable to remove rust, surface contaminants and coatings, stripping paint. To clean weld seams. Direct mounting to angle grinders due to intergrated backing, no additional backing pad required.

### FVOW

Cleaning roller consists of synthetic fiber, grit and resin. Fast and consistent cleaning on stainless steel.

### FVOK

FVOK cleaning discs with shaft consist of synthetic fiber, grit, and resin. Ideally suited for stainless steel, fast and constant cleaning, cleaning of metallic surfaces without material removal. Safer than wire brushes. Especially suitable for cleaning of weld seams, removal of scale and discolorations. Stripping paint from metal surfaces, removing coatings, rust, etc. General plant maintenance.

### FVOS/FVOS-K

Cleaning disc for use with Mandrel FD. Ideal on stainless steel, fast cleaning of surface without material removal. Especially suitable for cleaning of weld seams, removal/cleaning of discolorations. Removal of scale, stripping paint, coatings etc. FVOS-K for hook-and-loop mounting.

### FD

Mandrel for FVOS allows joining of up to 2 discs.

## Flap wheels Soft and pliable

### FSW flap wheels

- Uniform treatment of hollows and high spots.
- Vibration-free working of edges and corners.
- Wide choices of dimensions and grain sizes for work of all kinds.
- Flap wheels  $\varnothing$  165 mm with recessed face mandrel does not protrude and interfere with work.
- **SUMNER** SUBOL grinding oil enhances the cutting performance.
- **SUMNER** flexible power tools provide the right speed for every flap wheel.

### FVSK non-woven, inter-leaved fiber brushes/drums

- The ideal combination of abrasive flaps and non-woven material.
- The logical choice following a flap wheel, for a satin finish.
- The smooth flaps better handle uneven surfaces.
- No scratches – forgives grinding errors.
- Ideal for removal of scratches.
- Especially suitable to match pre-worked areas, i.e. after grinding welds on stainless steel.
- FVSK produce a finer scratch pattern than FSW.

## Non-woven Nylon Brushes

### Soft grinding with a smooth finish

#### Non-woven Nylon Brushes and Drums

- Flap type, soft touch with small amount of grit for even grinding and smoother finish. The brushes are pliable and better adjust to the material.
- For various stages of finishing up to mirror finish.
- For cleaning and finishing jobs in the appliance industry, food & beverage equipment manufacturers, stainless steel fabricators, etc.

## SUN-Press and SUN-Roll

Pressed and wound fiber-fleece tools to meet the highest demands

### SUN-Press:

pressed fiber-fleece tools

- For deburring, cleaning, levelling, finishing and pre-polishing.
- Time-saving and cost-effective: only one work step removes weld seams and achieves a perfect, shining surface.
- For all materials, in particular for Inox, titanium and aluminum.

Type	Size Max. rpm	Soft Density 2	Soft/medium Density 4	Medium/hard Density 6	Hard Density 8	Extra-hard Density 10	
SUN-flx (Roll-On)	75 x 6 x Roll-On 12000	SUN-Press R 75 2SF HVFS 908 801	SUN-Press R 75 4SF HVFS 909 824	SUN-Press R 75 6AF HVFS 909 825	SUN-Press R 75 8AM HVFS 908 800		5
Wheels 150 mm	150 x 3 x 25 mm 6000			SUN-Press 150/3/25 6SF HVFS 909 475	SUN-Press 150/3/25 8AM HVFS 909 476	SUN-Press 150/3/25 10AM HVFS 909 623	10

### SUN-Roll and SUN-Roll finish

Wound fiber-fleece tools

- For deburring, levelling and polishing small workpieces.
- For all materials, in particular Inox, titanium and aluminum.
- **SUN-Roll finish:** open structure for dull decor finish.

## Flap brush

for finishing a variety of complex surfaces

**BSK: Flap brush**

- For finer finishes on metals, woods, plastics, rubber and ceramics.

**BSK-SB: Abrasive strip package**

- For self loading.
- Resin bonded silicon carbide.
- Each head requires a set of 3 strip packages (12 strips).

**BSK-FB: Refill brush package**

- For replacement.
- Requires 1 set with 12 strips per head.

**BSK-FBH:**

Replacement fiber brush holder

- Requires 12 pieces per head.

## Spiral Bands

Easy to use with efficient results

### ESB VA/PSWB VA

- High performance abrasive spiral wound bands for expandable drums ESR and inflatable drums PSW, available in VA (for steel, stainless and aluminum).
- Ideal for pre-grinding stainless steel vessels, grinding off spot welds, mold polishing, deburring ends on tubes, etc.

### ESB FVV/PSWB FVV

- Surface conditioning bands and belts.
- Produces satin finish on a variety of metals.

- To finish, polish and buff metal, wood and plastic surfaces.
- Available in 3 grits.

### ESB TZ/PSWB TZ

- Abrasive belt with regenerating pyramid structure.
- For hard metals and Inox.
- Work steps can be skipped: time-saving and cost-effective.
- Extra-long service life.

### ESR

- The band is mounted on a slotted expandable drum.
- Guarantees a firm grip and increased elasticity.
- Allows use of the full width for grinding.

### PSW

- «The Formula – 1 tire for a great finish»
- Pneumatic inflatable drum. Pressure is adjustable, to suit the application on a given work piece.
- Use air gun for inflation.

## Grinding and finishing belts

Suitable for **SUHNER** belt grinders (S. 32–33)

### BSGB VA

- Coated abrasive belts for ferrous and non-ferrous metals, timber & plastics.

### BSGB FVV

- Non-woven nylon abrasive surface conditioning belts: fast and easy.
- For refining rough surfaces with little or no dimensional change to the work piece.

- For oxide removal, deburring, decorative finish, cleaning and conditioning, wood sanding.
- Gets the job done in fewer steps than conventional products, while generating a uniform scratch pattern.
- Available in 5 grits.

### BSGB TZ

- Abrasive belt with regenerating pyramid structure.
- For hard metals and Inox.
- Work steps can be skipped: time-saving and cost-effective.
- Extra-long service life.

## SUN-fix

### The first complete Grinding System

The **SUN-fix** Grinding Program with Quick-change System from **SUNNER** Offers the following advantages:

- Highest safety and service life of disc through direct mounting to pad holder.
- The right abrasive for the continuous sequence from material removal to mirror finish.
- The right power tool with the right speed selection from Electric, Air and/or Flexible shaft Grinders/Polishers.

#### SUN-fix VA/ST (Grinding discs)

- **VA/ST** for Steel, stainless steel, hastalloy, titanium, cast iron. Due to the integrated cooling agent, there is no discoloring or overheating of the work piece. The life of the disc increases and the grinding performance improves (up to 25%).

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
VA/ST	19	36	SB R 19 VA/ST	—	SB 19 VA/ST	908 641	20 000	100
		60		—		908 642

		240		908 934		908 689		
		320		908 935		908 690		

### SUN-fix VA (Grinding discs)

- VA especially suitable for stainless steel, due the integrated lubricating agent, which results in an optimal surface finish without becoming discolored.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
VA 	50	36	SB R 50 VA	908 451	SB 50 VA	900 930	20 000	100
		60		908 452		900 931		
		80		908 453		900 932		
	75	36	SB R 75 VA	908 460	SB 75 VA	900 933	12 000	50
		60		908 461		900 934		
		80		908 462		900 935		

### SUN-fix FVVS (Reinforced surface conditioning disc)

- FVVS The reinforced backing imbedded in the nylon structure of the disc provides additional strength and durability for edge work.  
To remove pre-ground scratches and to remove rust or discoloration. Results in clean and smooth surface for all operations above grit 80/120.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
FVVS 	19	C (coarse)	FVVS R 19	–	FVVS 19	900 940	20 000	50
		M (medium)		–		–

		M (medium)		908 473		900 967		
		F (fine)		908 472		900 968		

### SUN-fix FVOS (Cleaning discs)

- FVOS for removal of corrosion, discoloration, cleaning of weld seams and surfaces without removing material, stripping paint.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
FVOS 	50	–	FVOS R 50	908 798	FVOS 50	908 017	20 000	25

### SUN-fix LFS (Mini flap discs)

- LFS cool, soft and operator fatigue free grinding with extremely high life-time and even grinding performance. Suitable for steel, stainless steel, high alloy steels, cast iron, non-ferrous metals and aluminum.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
LFS 	50	40	LFS R 50 VA	908 785	–	–	20 000	10
		60		908 786		–		
		80		908 787		–		
	75	40	LFS R 75 VA	908 788	–	–	12 000	10
		60		908 789		–		
		80		908 790		–		

## SUN-fix LFS-F (Flexible mini flap discs)

- LFS-F Optimum cooling of disc and work piece, perfectly suitable for radii and contours. Used for steel, stainless steel, high alloy steels, cast iron, non-ferrous metals and aluminum.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
	50	40	LFS-F R 50 VA	908 791	-	-	20 000	10
		60		908 792		-		
		80		908 793		-

		60		908 795		-		
		80		908 796		-		

## SUN-fix BVSF (Cotton laminated discs)

- BVSF Grinding and finishing in one process. Cool grinding without clogging on aluminum. Used for steel, stainless steel, cast iron, titanium, non-ferrous metals, and aluminum.

Type	∅ mm	Grit	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.		
	50	A 36	BVSF R 50	908 779	-	-	20 000	5
		A 80		908 780		-		
		A 120		908 781		-		
	75	A 36	BVSF R 75	908 782	-	-	12 000	5
		A 80		908 783		-		
		A 120		908 784		-		

## SUN-Press HVFS (unitized discs)

- SUN-Press HVFS Easy stock removal and perfect shine. For deburring, cleaning, levelling and pre-polishing (depending on hardness). Can be used on Inox, titanium, aluminum. See also p. 10.

Type	∅ mm	Hardness	Grit	Roll-On		Turn-On		MOS rpm	
				Type	Order Nr.	Type	Order Nr.		
	75	2 (soft)	s/c fein	SUN-Press R 75 HVFS	908 801	-	-	12 000	5
		4 (soft/medium)	s/c fein		909 624		-		
		6 (medium/hard)	a/o fein		909 625		-		
		8 (hard)	a/o med.		908 800		-		

## SUN-fix FSB (felt polishing discs)

- FSB Optimum buffing of smaller surfaces.

Type	∅ mm	Roll-On		Turn-On		MOS rpm	
		Type	Order Nr.	Type	Order Nr.		
	50	FSB 50 R	908 926	-	-	20 000	50
	75	FSB 75 R	908 762	-	-	12 000	10

## SUN-fix SBH (Pad holders)

- SBH with removable 6 mm and 1/4" shank or M14 female thread for angle grinders.

Type	∅ mm	Hardness	Roll-On		Turn-On		MOS rpm	
			Type	Order Nr.	Type	Order Nr.

## Non-woven nylon discs, hand pads & shop rolls

### The all-rounders for daily use

#### FVVS 127

- Unitized surface conditioning disc.
- With fiber backing-, stronger and more aggressive.

#### FVVS 115-K/178-K

- Sturdy, reinforced disc with hook-and-loop fastening.
- For removal of rust and discoloration, stripping of paint, sealant, and decorative surfaces on metal.
- Blending, deburring, and cleaning weld seams.
- Used in maintenance of boats, vehicles and aircraft.

Type	Grits and Order Nr.				Ø mm	MOS rpm	Backing pad	Weight kg

#### FVV-B

- Hand pads for manual cleaning and finishing, available in A/O or SC.
- Provides an even scratch pattern.
- Can be used with pad holder, hook-and-loop mount.
- Excellent cleaning results.
- Elastic-matches all contours.
- Use in wet and dry applications.
- Use instead of steel wool.

#### FVV-SR

- Shop rolls for cleaning and finishing. Operator cuts them to required size. Roll size 10 m x 100 mm.
- For touch up work on stainless steel and aluminum.
- For cleaning tools.
- For roughening surface prior to painting, bonding, etc.
- Leaves a fine scratch pattern.

#### Hand Pad Holder

- With hook-and-loop mounting. Provides an even surface.

#### Mini Mandrel

- Small strips from roll are mounted to the Mini-mandrel to work on hard-to-reach places.

- **SUHNER** Electric power tools guarantee high power output, safety and reliability.
- High performance at an excellent power-to-weight ratio.

- Ergonomically designed

## Ergonomic Power

### The Optimum Speed for the Application

#### Straight Grinders

- **SUHNER** high performance straight grinders cover all applications, high speed and low speed.
- Ideal handling due to the long neck spindle housing.
- The electronic variable speed control allows use of abrasives and burrs at optimum efficiency.

Type	Description	Voltage	Order Nr.	Power	MOS rpm	Spindle mm	
	USK 3-R	Straight Grinder (variable speed)	230 V	111 194	1530 W	1400–3000	12

## Air Tools

### Compact Tools for Serious Applications

#### LSA 80/81

- Compact Straight grinder.
- Extremely light weight, feels like a pencil in your hand.
- Rugged, with a proven track record.
- LSA 80 Front exhaust for a clean work place.
- LSA 81 Rear exhaust with integrated muffler in the exhaust hose.

#### LWA 80/81

- Compact angle grinders.
- For precision deburring and polishing jobs.
- LWA 80 with adjustable 360° side exhaust.
- LWA 81 Rear exhaust with integrated muffler in the exhaust hose.

#### LGS 30

- Engraving pen with tungsten carbide stylus points for engraving metals, glass, plastics.
- Vibration free.

#### LWA 70 KF

- Commutator cutter with adjustable depth gauge for milling using diamond blades.

Type	Description	Order Nr.	Speed No-Load mm	Spindle/collet mm	Power W	Air consumption (m <sup>3</sup> /min)	Exhaust	Weight kg

**LWB 20 DH, LSB 35/20 DH, LPB 12 DH**

- Powerful straight and right angle grinders/polishers.
- Optimum gear support.
- Particular suitable for hard-to-reach areas.
- Slim, high torque.
- LFP 12 with 1/4" working spindle for direct mount of backing pad (no shank), suitable for **SUN-fix** grinding system (see pages 14–16), compact head design.

**LFC 12**

- Profiler and Saw with adjustable stroke 2–8 mm.
- Low levels of noise and vibration.
- For fine deburring, polishing and lapping in mold and die shops, aluminum castings and sculpting.

**LSB 44 DH**

- Ergonomically designed high performance straight grinder muffled rear exhaust.

**LSB 70**

- Sets new standards for high speed grinders.

**TOP = Usable with or without oil**

## Air Grinders – Polishers

The Size You Want – the Power You Need

• Pneumatic tools for use with or without oil. Clean exhaust and breathing air, no oil film on the work piece. High performance, even in dry operation. Long service life due to use of HT- composite motor parts. Ergonomically designed. Scratch resistant insulated housing.

### LSC, LLC und LWC TOP

- Thoroughly tested by craftsmen and industry. Built-in rear exhaust muffler, slim design. Modular design to reduce parts inventory. Service friendly, reduces downtime.

### LWG, LLG, LSG

- 900 watts: excellent size-to-power ratio.
- State-of-the-art technology for noise reduction.
- Exhaust blown off to rear.

### LLC 4, TOP

- Specially suited to use the vast range of SUN-fix surface conditioning, finishing, abrasive and polishing products.

**LWH, LLH**

- Powerful right angle, die and extend neck grinders for rugged use in an industrial environment.
- Ergonomically designed. Insulated scratch resistant motor housing, heavy duty spindle bearings, low noise level with muffled rear exhaust.
- Ideal for heavy duty work in metal fabrication, foundries, forges, ship building, heavy equipment industries, farming implements, etc.
- **LWH 6** for Grindings/Cutting wheels 178 mm.
- **LWH 9** for Grindings/Cutting wheels 150 mm.
- **LWH 12** for Grindings/Cutting wheels 125 mm.
- **LLH 12** with mandrel SPG and wheel guard SH 127 for type 1,  $\varnothing$  125 x 25 x 22 mm grinding wheels.

**TOP = Usable with or without oil**

## Triple Flexibility With Flexible Shafts

### Advantages of Flexible Shaft Grinders/Polishers:

- The most versatile and unique range of grinders/polishers for all materials.
- Light weight tools with excellent power to weight ratio.
- Also suitable to work in hard-to-reach areas.
- Wide speed range.
- Constant speed.
- High stock removal rate.
- All models with rugged frame for portable or suspended use.
- Low noise levels.
- Reduced in-hand weight vs. hand tools.
- Quick change hand pieces.

Machines Type	Description	Order Nr.	Shaft mounting	Voltage V/50Hz	Power W	Weight kg

Rotaset

Minifix

### Rotostar Kit

- High performance grinder with double insulated motor, suitable for all household power outlets or use with generators.
- Heavy duty work even in hard-to-reach areas.
- Softstart.
- Motor frame protects tool in all positions.

Order Nr. 110 143

### Rotaset Kit

- Powerful universal, double insulated electric drive motor.
- Multi-purpose unit with large selection of attachments.
- Constant speed even under full load.

Order Nr. Rotaset 28: 110 157, Rotaset 25-R: 110 159

### Minifix Kit

- Light weight and compact, guarantees work without operators fatigue.
- Noise suppressed machine for delicate work.
- Easy to handle hand pieces for optimal work performance.

Order Nr. Minifix 28: 110 155, Minifix 25-R: 110 153

### Complete Rotostar Kit:

Consist of: Universal, double insulated 1-phase electric motor, 3-speed gear box (3000, 6000, 12000, rpm), 3 m power cord and plug, with flexible shaft NA 10 x 2000 mm DIN 10/G 28, straight hand piece with 6 mm collet, set of wrenches, robust metal carrier case.

### Complete Rotaset Kit:

Consists of: Universal electric drive motor in sturdy frame, with suspension hook, 3 m power cord and plug, Flexible shaft NA 7 x 2000 mm, DIN 10/G22, straight hand piece FH7 with 6 mm Collet, Angle grinder WIG 7 (gear ratio 2.7:1), wheel guard and flange set for 115 mm  $\varnothing$  grinding and cutting wheels. 115 mm grinding and cutting wheel, wire cup brush TDB 70, 70 mm, Mounted points AR-O A 1325 V, A 2025 V, B 2006 V, Backing pad Type FSS 1110. Two each fiber discs Type KFS 115 ST, grit 60 & 120, 1 set of wrenches, sturdy metal case.

### Complete Minifix Kit:

Double insulated 1-phase electric drive unit, 3 m power cord and plug, flexible shaft NA4 x 1250 mm DIN/G16, straight hand piece FH 4 with 6 mm collet, Set of accessories: 1 each HSS burr (HSS G 0615 F), vitrified mounted point K 0816 V, B 1303 V, F 0808 V, polishing bob FPB 1208, set of wrenches and metal case.

## Flexible Shaft Grinders/Polishers With Gearbox – Three Phase

ROTOFIX

### Versatility In Every Gear

Speed Range: 750, 1400, 3000, 6300, 11000 min<sup>-1</sup>

G28

### ROTOFIX F G28

Order Nr. 110 007 (400 V, 50 Hz, 3 Ph, 0,5 kW, 11,5 kg)

- 5-speed gearbox drive, heavy duty flexible shaft grinder/polisher.
- Dust sealed and air cooled three phase 500 W (0.67 hp) induction motor.
- Multi-purpose unit with extensive selection of **SUMNER** accessories.

DIN10

### ROTOFIX F DIN10

Order Nr. 110 008 (400 V, 50 Hz, 3 Ph, 0,5 kW, 11,5 kg)

ROTOFERA

### The Right Speeds and Power for Most Applications

Speed Range: 850, 1600, 2100, 3200, 5700, 8000 and 12 000 rpm

G28

### ROTOFERA F G28

Order Nr. 110 019  
(400 V, 50 Hz, 3 Ph, 1,0 kW, 16,8 kg)

- Most widely used flexible shaft grinder in the world.
- 7-speed gearbox can be used in 28 different speeds, with optional speed increaser RG or speed reducer RZ 5.
- Virtually maintenance free dust sealed. Air cooled 1000 Watt (1.34hp) three phase induction motor.
- Rugged design, built for long service life.

DIN10

### ROTOFERA F DIN10

Order Nr. 110 020 (400 V, 50 Hz, 3 Ph, 1,0 kW, 16,8 kg)

ROTAR

### Best Speeds and Power for Heavy Jobs

Speed Range: 1000, 1700, 2700, 5100, 7300 and 13500 rpm

- Most economical heavy duty grinder available.
- 6-speed gearbox, extremely high torque transmission,

DIN15

### ROTAR STM DIN15

Order Nr. 110 031 (400 V, 50 Hz, 3 Ph, 2,4 kW, 50,5 kg)

All machines are supplied without plugs.  
Suitable plugs need to be installed by a specialist.

**Quality flexible shafts from the world leader**

- Separating the hand piece from the weight of the drive unit drastically reduces operator's fatigue even in continuous operation, increasing productivity.

**NA 4 x 1250 G28/G16**

# ROTOMAX 3,5

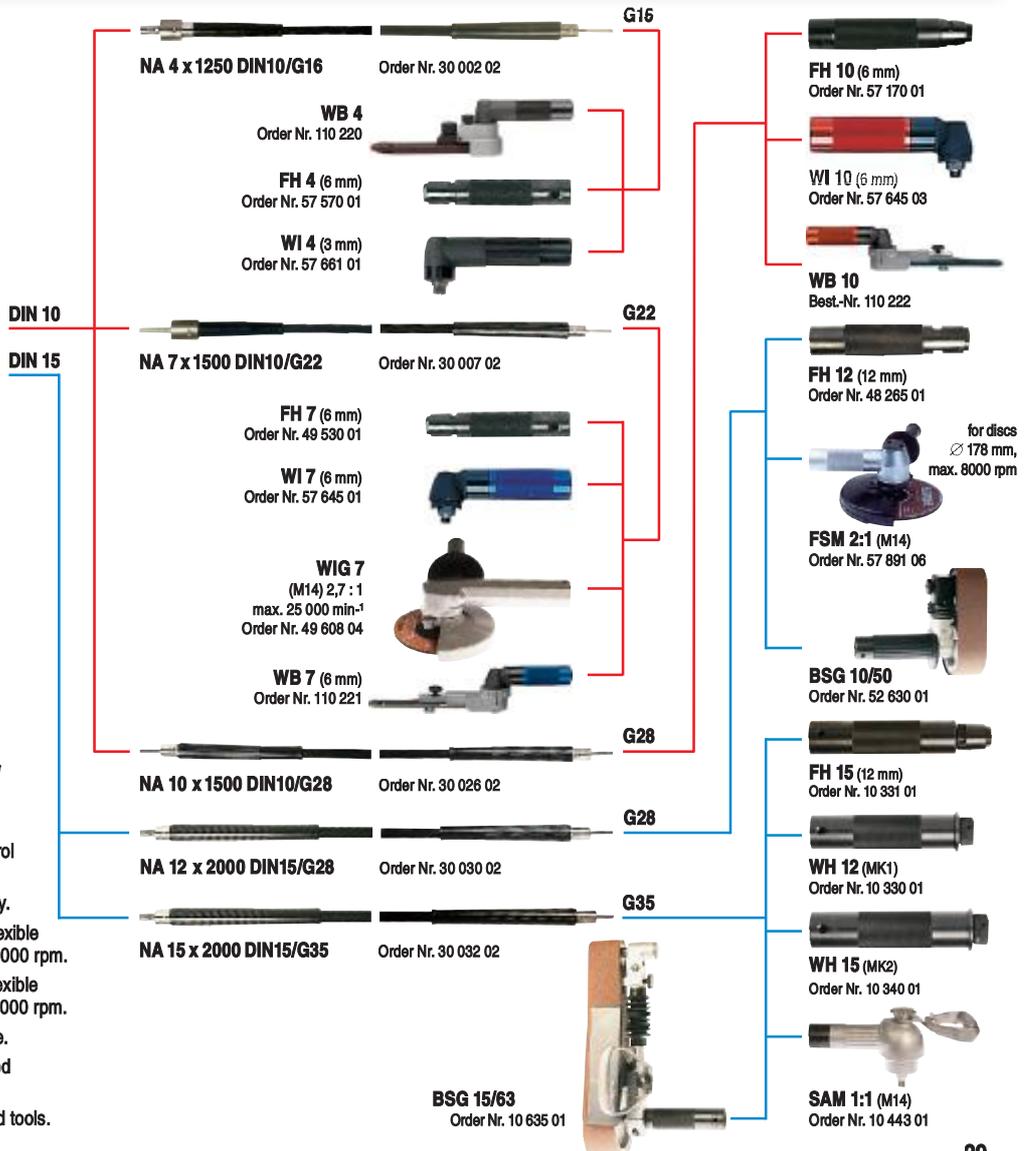

The star of Grinding Machines

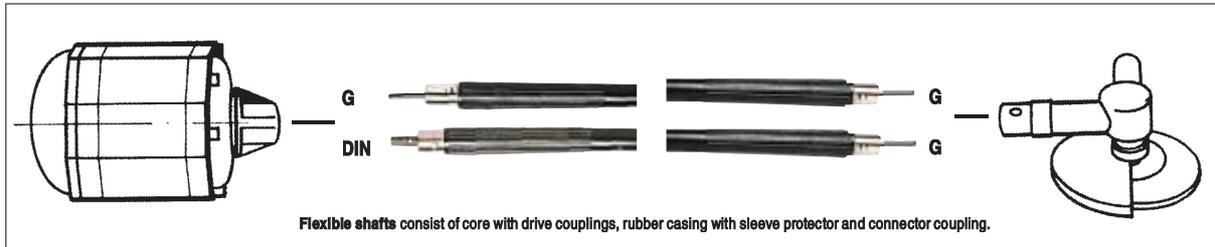

## ROTOMAX STM 3,5 kW

Order Nr. 110 204  
 (400 V, 50 Hz, 3 Ph) 70 kg

- Variable speed button control selector.
- Speed gauge in LED display.
- Speed range with DIN 10 flexible shaft connection, 500 to 25 000 rpm.
- Speed range with DIN 15 flexible shaft connection, 500 to 10 000 rpm.
- Soft start, with built-in brake.
- Time saving due to simplified drive change.
- Dolly with tray for shafts and tools.

## Expert shafts

### High-tech for handymen

#### Expert shafts

- Shafts from the **SUNNER**-standard range: high-tech for handymen.
- Flexible grinding using a drill: easily connected to any handheld or table-mounted drill thanks to the cylindrical mandrel (on motor).
- Lightweight and extremely flexible for speeds up to 25,000 rpm.
- Comes with drill chuck as standard (SKG 4 with 6-mm collet).

Type	Order Nr.	Max. MOS rpm	Inner core $\varnothing$ x length	Outer casing	Bearing both ends	$\varnothing$ Chuck	mm	Weight kg

## Abrasive belt sanders

Flexible and precise

### UBK 6-R

- High-performance electric belt sander for large-surface application.
- Continuously adjustable from 2800 to 6000 rpm.
- Available in two widths for belts BSGB 35/450 mm and BSGB 50/450 mm.

### UTG 9-R

- Handy electric pipe belt sander.
- 220° belt wrap-around.
- For sanding pipes up to 70 mm diameter.
- Digital control electronics.
- Soft start: preserves motor and tools.

### UTC 7-R

- High-performance compact belt sander.
- 180° belt wrap-around.
- For sanding pipes up to 45 mm diameter.
- Digital control electronics.
- Soft start: preserves motor and tools.

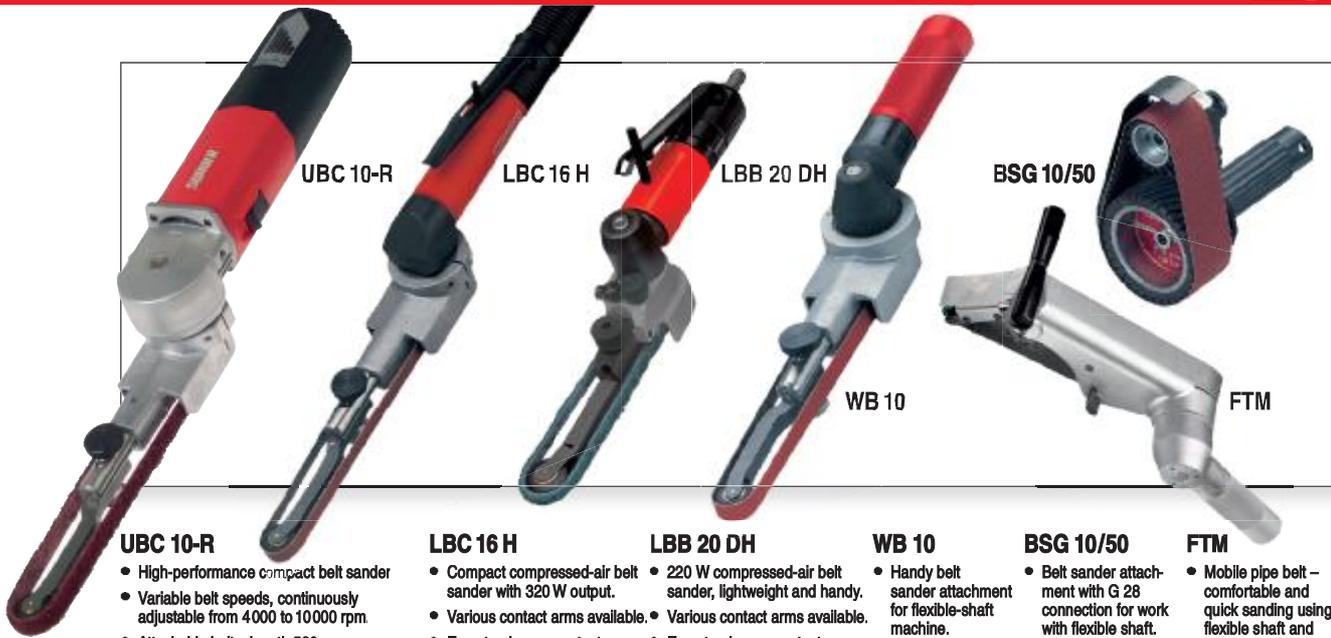

### LBH 7

- High-performance compressed-air belt sander meets the highest demands.
- Particularly suitable for large-surface application.
- Available in two widths for belts BSGB 35/450 mm and BSGB 50/450 mm.

Electric belt sanders	Type	Description	Order Nr.	Speed No-Load rpm	Voltage	Power	For belt	Belt speed

	LBH 7 D 50		112 010		0,660		BSGB 50/450	

**UBC 10-R**

- High-performance compact belt sander
- Variable belt speeds, continuously adjustable from 4000 to 10000 rpm
- Attachable belts: length 520 mm, available in widths 3, 6, 12, 16 and 19 mm.

**LBC 16 H**

- Compact compressed-air belt sander with 320 W output.
- Various contact arms available.
- Easy-to-change contact arms and easy belt adjustment.

**LBB 20 DH**

- 220 W compressed-air belt sander, lightweight and handy.
- Various contact arms available.
- Easy-to-change contact arms and easy belt adjustment

**WB 10**

- Handy belt sander attachment for flexible-shaft machine.

**BSG 10/50**

- Belt sander attachment with G 28 connection for work with flexible shaft.

**FTM**

- Mobile pipe belt – comfortable and quick sanding using flexible shaft and FTM.

We are continually expanding our application documentation to meet your requirements.

**SUHNER.**  
**Your Service Plus**

**Personal Consultation and Demonstration Concept:**

Discover rationalization options. All our field reps are competent grinding experts with years of experience and a demo van fully equipped to solve your grinding problems on site.

**Telephone and Customer Service:**

Your order is our first priority. Your orders are recorded and processed only minutes after receipt so that you can produce without delay.

**Warehouse and distribution**

Your orders are immediately prepared for shipment by our well-stocked warehouse and shipped per your instructions to reach you in the fastest way. So that you can rely on us – even when time is short.

**Research & Development/Manufacturing:**

We're still there for you after your purchase: our Service Center has its own warehouse and guarantees supply within good time – quotes available upon request.

**Development and production**

Thanks to in-house design and production, we are able to respond quickly to new market requirements. This allows us to incorporate your own ideas directly in our products and to continually present improved technology and new products.

**Training and specialist conferences**

In order to make work easier for you we have in conjunction with our customers, outlined a variety of common application solutions. Just ask us for the respective Application News letters and we gladly mail them to you. In addition, we regularly hold the popular Inox seminars for our customers in cooperation with renowned partners. Simply request the brochures.
